What if we add raisins as well as walnuts? As a result of this combination of natural ingredients we have a product that is doubly nutritious, tasty and with a sweet touch. It's a soft piece, with a spongy crumb, easy to bite and enveloping aroma. Walnuts are a source of fibre, minerals and proteins and raisins, on the other hand, are a great source of energy, as they contain high doses of carbohydrates. For all these reasons, their consumption is highly recommended for sportsmen and women and people who maintain a high level of activity.
